Josefina Estevez de Urquiza

Bachelor's Degree in Computer Science (*National University of La Plata (UNLP), Argentina)*

Email: josefinaestevez91@gmail.com | **LinkedIn:** linkedin.com/in/josefinaestevez

Passionate developer with extensive experience building web applications, microservices, and shared libraries. Adept at leading projects, collaborating across departments, and engaging with diverse stakeholders. Skilled in prioritizing, organizing, and scoping tasks to drive efficient project delivery.

Last Professional Experience

Full-Stack Engineer – TIDAL (Block, by Twitter co-founder Jack Dorsey)

📍 *Barcelona, Spain (Remote) – 2022 to Present*

L6* engineer leading the development of microservices, shared libraries, and critical projects like login/signup flows, payment integrations, and artist engagement tools. Collaborate with cross-functional teams across countries to deliver seamless integrations.

L6 engineers at Block serve as team leaders, driving medium-to-large features and multi-person efforts that span engineering team boundaries. They provide technical leadership, resolve complex challenges, ensure successful project delivery, and foster collaboration across teams.

💻**Technologies:** NuxtJS, VueJS, Express, Microservices, MongoDB

🗣 **Feedback & Kudos**

Marius Oppedal – Engineer Manager
"Josefina is a highly efficient and driven developer at TIDAL who has a talent for absorbing information and learning new things. Furthermore, her communication and collaboration skills are excellent, which has been noted by several stakeholders, when she took on parts of my job during my summer vacation."

Marc Düker – Backend Engineer
"Josefina has been an incredible collaborator on the Sheer ID migration at TIDAL. Her communication is consistently clear and effective, making our work together smooth and efficient. I really appreciate how quickly she responds and addresses issues, often resolving them in record time. Josefina also excels at taking responsibility when decisions need to be made at a higher level and making sure that every detail is taken care of. It's been a pleasure working with her, and I'm always confident that everything is well-managed when she's involved. Her dedication and responsiveness have made a huge difference in the success of our project, and I'm very happy to continue working with her."

Marcel Azeroth – Partnerships Stakeholder

"Josefina has been a great help today in an urgent troubleshooting request at TIDAL. As usual, she offers swift replies and a strong understanding of the campaign web flows, either helping immediately or pointing me in the right direction. This strongly improves our turnaround times and helps us move projects efficiently."

Euan Crowe - PM

"*Josefina has taken charge of the work around signup events updates and requirements, formalised a process for the stakeholders and provided them with perfectly communicated, clear & concise instructions. This makes me confident that the project is well under control on our end.*"

Other Professional Experience

Tech Lead – BMAT Music Innovators

📍*Barcelona, Spain – 2019 to 2022*

- Partnered with the VP to define project priorities and steer the team toward successful execution.
- Led the technical design and development of real-time data applications for the music industry, serving clients like record labels and music publishers.
- Optimized system performance to process millions of daily music usage events efficiently.

💻 **Technologies:** Python, Django, VueJS, ClickHouse, Apache Airflow, AWS

Full Stack Developer – DevsAr (Acquired after by Ripio)

📍*La Plata, Argentina – 2016 to 2019*

- Delivered diverse projects, including Torchweb (a platform for molecular design) and Find Your Trainer (a fitness marketplace).
- Worked directly with clients to define requirements and provide tailored solutions.

💻 **Technologies:** Python, Django, VueJS, PostgreSQL, GraphQL, Stripe, Ionic

Software Developer – Idees Consultancy

📍*La Plata, Argentina – 2015 to 2016*

- Developed multiple projects using the MEAN stack in a small team environment.
- Worked closely with designers and clients to deliver custom web solutions, handling both front-end and back-end development.

💻 **Technologies:** Node.js, MongoDB, AngularJS, Express
